New Combo: At a glance

Dynamic Surround View
Digital rear view camera with blindspot and flankguard, with 180° Visiopark panoramic camera

Bold and Pure design
First LCV to feature Vizor front end with new Griffin badge

Pick your powertrain
All-electric and diesel models available

Optional features
Include FlexCargo, Winter Pack and Drive Assist Pack

Class-leading lighting
Pioneering Intelli-Lux Matrix light technology

Plenty of choice
Two or three front seats, plus five-seat Crew Van

Diesel double
1.5-litre engine offered with 100PS and 130PS

Customer friendly
Two easy-to-follow trim levels available, Prime and Pro

Shift your way
Choice of automatic and manual transmissions

Improved safety
Suite of up to 18 Advanced Driver Assistance Systems

Stay connected
Wireless Apple CarPlay and Android Auto compatibility

Digitally enhanced
Infotainment powered by Qualcomm Technologies' Snapdragon Cockpit

Improved infotainment
Upgraded 10-inch touchscreen complemented by 10-inch digital instrument cluster

New Combo Electric: At a glance

Made in Britain
Built at Ellesmere Port, UK's first EV-only volume manufacturing plant

Class-leading lighting
Pioneering Intelli-Lux Matrix light technology

Fast charging
100kW rapid charging delivers 0% to 80% in less than 30 minutes

Impressive payload
781kg is best-in-class

Easy to operate
Paddle-selectable brake regeneration

Optimised efficiency
Eco, Normal and Power driving modes

Charging choice
7.4kW on-board charger is standard; 11kW charger is optional

Playing it cool
New optional heat pump conserves battery range in low temperatures

No compromises
Up to 4.4 cubic metres of storage space (same as diesel)

Market leader
Vauxhall was the UK's number one electric van brand in 2021, 2022 and 2023

Next-generation battery
52kWh tech offers up to 213 miles of range (WLTP) - 38 miles greater than before

New Vivaro: At a glance

New look
Features Vizor front end for the first time, plus LED® lights

Power choice
Available as new Vivaro Electric or with efficient diesel engines

Stay connected
Wireless Apple CarPlay and Android Auto compatibility

Interior update
Infotainment systems with up to 10-inch colour touchscreens

Carrying capacity
Up to 6.6 cubic metres of volume and 1.4 tonnes of payload

Superior graphics
Courtesy of Qualcomm Technologies' Snapdragon Cockpit

Vast versatility
Panel Van, Doublecab and platform chassis offered

Better to drive
New electronic power steering makes new Vivaro feel more car-like

Plenty of choice
Two lengths available (4.98 metres and 5.33 metres)

More equipment
Significant specification enhancements

Customer friendly
Two easy-to-understand trim levels available, Prime and Pro

Safer than ever
Suite of 18 Advanced Driver Assistance Systems

Shift your way
Automatic and manual transmissions

Dynamic Surround Vision
Camera-based tech improves safety

Terrific turbodiesels
1.5-litre and 2.0-litre engines offered with outputs from 120PS to 145PS

New Vivaro Electric: At a glance

Battery boost
75kWh tech now offers up to 219 miles of range (WLTP)

Fast charging
100kW rapid charging delivers 5% to 80% in 45 minutes

Market leader
Vauxhall was the UK's number one electric van brand in 2021, 2022 and 2023

Going the distance
Increased range is 14 miles greater than before

Optimised efficiency
Eco, Normal and Power driving modes

Driving pleasure
Electric power steering now standard

Easy to operate
Paddle-selectable brake regeneration

Plenty of power
100kW/136PS electric motor with 270Nm of torque

e-Power Take-off Unit
New feature powers ancillary items from traction battery

No compromises
Full versatility in space utilisation and loading volume

Charging choice
7.4kW on-board charger is standard; 11kW charger is optional

New Movano: At a glance

Eat & Work
Optional bench seat can be used as a work surface or small table

Taking control
Movano can steer, brake and accelerate itself at up to 18mph

Ready to work
Up to 17 cubic metres of cargo volume and two tonnes payload

Plenty of choice
26 different versions, with wide range of body styles

Classier cockpit
Redesigned dashboard, steering wheel, gearbox controls and door trim

More to come
Movano HYDROGEN soon to be offered with 311-mile range (WLTP)

New look
Refreshed front end design

Pick your power
New Movano Electric offered alongside efficient turbodiesels

ADAS pioneer
Advanced Driver Assistance Systems enable Level 2 automated driving

Vast versatility
Panel Van, Glazed Panel Van, Chassis Cab, Chassis Doublecab and Platform Cab versions

Top efficiency
Fuel consumption cut by up to nine per cent compared to previous versions

New Movano Electric: At a glance

Market leader
Vauxhall was the UK's number one electric van brand in 2021, 2022 and 2023

Optimised efficiency
Eco, Normal and Power driving modes, plus paddle-selectable brake regeneration

Practical power
New optional 230V dash socket keeps devices charged

Torque show
Torque is increased to 410Nm for superior acceleration

Improved quality
Now a fully integrated OE solution

Better battery
New 110kWh battery replaces previous 75kWh unit

No compromises
Up to 17 cubic metres of storage space (same as diesel)

Mapped out
Seven-inch digital instrument cluster shows key info

Fast charging
0% to 80% in 55 minutes at 150kW rapid charger

Feel the power
New electric motor with 205kW/279PS

Pulling power
Movano Electric can carry a payload of up to 1,385kg

Trailblazer
First Vauxhall to offer option of charging with up to 150kW

Going the distance
Increased range of 263 miles (estimated WLTP) is up to 107 miles more

Easy charging
Three-phase 11kW onboard charger is standard for AC charging

Electric Streets

EV registration figures are growing as Britain continues to make progress on its electrification journey, meaning the demand for accessible charging solutions will continue to rise for UK motorists.

40% of British households do not have access to a driveway[1], while data shows that more than 80% of electric vehicle charging is carried out at home[2], making many drivers across the country reliant on public charging infrastructure.

However, a freedom of information request by Vauxhall found that 56.5% of the 267 local authorities who responded still do not have a published on-street residential charging strategy in place. Although this figure has improved by almost 15% since 2023 (72% of UK councils)[3], the data reflects the work still to be done to reach the levels of accessible charging needed to match electric vehicle demand.

Vauxhall launched Electric Streets of Britain in summer 2023 to support the millions of drivers across the UK without access to a private driveway, with a focus on increasing the number of accessible residential on-street charge points so nobody is left behind in the transition to electric mobility.

Additional provision will bring specific benefits to van drivers. An estimated four in 10 company-owned electric vans are charged at home by employees, so the widespread availability of charge points will support businesses to go electric by helping van drivers to top up at home, and also as destination chargers, when they are attending residential jobs.[4]

In collaboration with leading charge point operators, char.gy, Connected Kerb and SureCharge, Vauxhall has set up an ‘Enablement Fund’ to help councils understand the scale of on-street charging issues, and the solutions available, alongside a new national database at http://electricstreets.co.uk/ to create a nationwide overview of where charging is required most.

Vauxhall’s new on-street charging demand map highlights the areas where infrastructure demand is highest. It shows the disparity in infrastructure levels across the country with a larger number of registrations found in the North of England compared to the South, with Leeds, Glasgow and Sheffield among the local authorities recording the biggest level of demand.

Whether you drive a Vauxhall or not, Electric Streets of Britain was created to support anyone wanting to drive an EV, welcoming drivers across the country to register their charging needs.

Vauxhall light commercial vehicles

Vauxhall is the only British brand within Stellantis, and is part of the company's Pro One light commercial vehicle line-up.

Pro One was announced in October 2023 as a strategic programme created to recognise the growing importance of LCVs to Stellantis, with the commercial vehicles business accounting for one-third of the company's net revenues.

The Pro One strategy brings the expertise of six different brands under one umbrella, with Vauxhall sitting alongside FIAT Professional, Opel, Peugeot, Citroën and Ram. The ultimate aim of Pro One is to help Stellantis achieve its Dare Forward 2030 strategic plan targets: doubling of commercial vehicle net revenues by 2030, compared to 2021; a 40% electric vehicle (EV) sales mix; and, generating €5 billion in service revenues.

Vauxhall's importance to Stellantis' global plans is underlined by its influence in the United Kingdom, where it is firmly established as one of the leading players in the LCV arena, particularly when it comes to electrification.

In 2023, figures from the Society of Motor Manufacturers and Traders showed that Vauxhall was the leading e-LCV manufacturer for the third year in a row, outselling its nearest competitor by more than double. Indeed, more than a quarter of e-LCVs sold in the UK across 2023 (29.8%) wore the Griffin badge, reaffirming its status as the undisputed market leader.

This is being increasingly recognised by a growing number of fleet operators, ranging from some of the UK's major companies, such as British Gas (Centrica) – which is being supplied with 3000 new Vivaro Electrics, the UK's largest commercial fleet EV order to date – and (BT) Openreach, to small businesses the length and breadth of the country.

This commitment to electrification is demonstrated by the fact that Stellantis' Ellesmere Port facility is currently Britain's sole EV-only volume manufacturing plant, following a £100 million investment. It's here that the Vauxhall Combo Electric is built, alongside small vans from the company's other European brands.

At a global level, Stellantis has made clear its intention via the Dare Forward 2030 initiative to reduce carbon emissions by 50 per cent by 2030 (compared to 2021) – and be globally net zero by 2038. This will make Stellantis an industry leader, with a timetable that compares favourably to other major OEM groups, many of which are working towards carbon neutrality globally by 2050.

Design

Vauxhall's Bold and Pure design language has become a defining feature of the passenger car line-up and its influence has now been extended to its range of light commercial vehicles.

The most obvious element of this is the introduction of the Vizor front end. The new Combo was the first van to get the distinctive design signature that has become such a characteristic of the brand's latest models, closely followed by the new Vivaro.

The Vizor is composed of a single smooth panel that sits between the headlights, integrating seamlessly with them and housing Vauxhall's advanced driver aids and safety technologies, with the Griffin logo at the centre.

The effect is to endow the new Combo and new Vivaro with a sense of dynamism, as well as make them instantly recognisable as Vauxhalls.

The new Movano, meanwhile, also benefits from a refreshed look that gives it a more modern appearance.

Design highlights for each vehicle are detailed on the folowing pages.

New Combo

The new Combo is available in two trims, Prime and Pro, with each providing their own distinct design features.

Prime complements the exciting new Vizor front end with 16-inch steel wheels with centre caps and side protection mouldings, bringing an additional touch of flair to the familiar Combo outline.

Pro enhances the front end with Intelli-Lux Matrix headlights, and adds body-coloured front and rear bumpers and sliding door rail cover, black-painted side protection mouldings, door handles and door mirrors and 16-inch steel wheels with full diameter wheel trims.

In addition, 16-inch seven-spoke alloys are available as an option.

The standard colour choice is Kaolin White, with metallics Kiama Blue, Quartz Silver and Pearl Black also offered.

New Vivaro

As with the new Combo, the new Vivaro is offered in both Prime and Pro specification, which bring some design differences.

Key features for the new Vivaro Prime models are their 16-inch steel wheels with centre caps, and side-protection mouldings.

Pro versions add body-coloured front bumpers, rear bumpers and door handles, as well as black-painted side protection mouldings.

Those looking to stand out even further will appreciate the optional 17-inch silver alloy wheels, while the LED lighting package can be added to with front fog lights.

On the new Vivaro, the standard colour choice is again Koalin White, with Mercury Grey, Quartz Silver and Pearl Black metallics also offered.

New Movano

Exterior updates have generally been focused on the front of the new Movano, to enhance a design that is already widely considered among the most attractive in its class.

Among the highlights are a new front bumper, a new body-coloured grille, black skid plate and new, more aerodynamic external mirrors. Full LED® headlights are also available.

At the rear, new Movano Electric models are marked out by newly designed lights.

The generously equipped Prime trim offers 15-inch steel wheels with centre caps on 3500 models, and 16-inch steel wheels with centre caps on 3500 Heavy and 4000 models. Full diameter wheel covers are available as an option, as are 16-inch diamond black alloy wheels.

A full palette of colours is offered, too. The standard options comprise Kaolin White, Thunder Grey and Expedition Grey, and these are complemented by three metallic colours in the shape of Metallic Black, Quartz Silver and Iron Grey.

Dimensions

As ever, Vauxhall's light commercial vans come in a wide variety of sizes, styles and configurations to ensure that businesses can order vehicles that are tailored exactly to their needs.

The new Combo is available in two lengths (standard and XL), and with a choice of two or three front seats. There is also a five-seat Crew Van.

Load volumes are sizeable, whatever version is chosen, with standard spec offering 3.3 cubic metres and the XL 3.9 cubic metres (or 3.8 cubic metres and 4.4 cubic metres respectively with the load through facility). The Crew Van, meanwhile, offers 3.5 cubic metres with the seats up (to the roof) or 4.0 cubic metres with the seats folded.

Similarly, the new Vivaro is also offered in two lengths (again standard and XL), a Doublecab and as a platform chassis for a variety of body types.

Once more, load volumes are vast. Standard Panel Van spec provides 5.3 cubic metres and the XL 6.1 cubic metres (or 5.8 cubic metres and 6.6 cubic metres respectively with the load through facility). The Doublecab has 3.2 cubic metres in standard guise, and 4.0 in XL.

The new Movano delivers the ultimate in choice, with three vehicle lengths (L2, L3 and L4), two wheelbases and three heights (H1, H2 and H3), as well as Panel Van, Glazed Panel Van, Chassis Cab, Chassis Doublecab and Platform Cab versions. Load volume ranges from a generous 10 cubic metres on the smallest version, to a huge 17 cubic metres on the largest.

A full list of dimensions for each vehicle is detailed on the following pages.

New Combo

Exterior dimensions (mm)	New Combo Panel Van	New Combo Panel Van XL	New Combo Crew Van XL

Interior

Vauxhall's leadership in delivering electrification across its van line-up is complemented by a focus on offering cutting-edge interiors that have been created to provide convenience, comfort and connectivity to drivers and passengers alike.

This is reflected in the new range of vehicles, which all feature improved infotainment packages.

Recognising the need to stay connected at all times, Apple CarPlay™ and Android Auto™ are available across the range, with wireless charging on some versions.

Plus all vans come as standard with access to Vauxhall Connect. This offers a suite of services including emergency calling, breakdown calling, vehicle status updates and more to ensure drivers stay connected and informed on the road.

Highlights of the individual vehicles are as follows.

New Combo

The new Combo features an upgraded infotainment system with Vauxhall's latest-generation user interface. Two trim levels are available – Prime and Pro – and on the latter, the new Combo became the first LCV to use Qualcomm Technologies' Snapdragon Cockpit Platform, which makes use of artificial intelligence to deliver a more integrated, adaptive cockpit experience that can evolve to suit the priorities and preferences of users.

Pro comes equipped with a Multimedia Pro Navi system, which features two separate displays, a 10-inch colour touchscreen and a 10-inch digital instrument cluster. Satellite navigation is enhanced by 2D/3D street level mapping, while natural voice recognition also features.

Alternatively, Prime variants of the new Combo are available with an innovative smartphone station, which allows the driver to use their smartphone to control the vehicle's infotainment, also interacting with buttons on the steering wheel.

A new steering wheel design also adds appeal, while there's no problem getting comfortable in the new Combo, with the driver's seat coming with six-way adjustment, including lumbar control.

The importance of protecting the cockpit is recognised by the inclusion of robust carpeting in the Electric models, and hard plastic floor covering in the diesels; Pro versions feature a PVC floor covering.

Also available is a Flex Cargo Pack, which provides extra flexibility courtesy of a bench seat for the two front passengers. This has a two-way foldable outer seat, and a fold-flat centre seat backrest with table, to enable working or eating, as well as a load-through bulkhead.

New Vivaro

The new Vivaro cockpit also benefits from Qualcomm Technologies' Snapdragon Cockpit platform, which enables state-of-the-art graphics, multimedia and computer vision capabilities, even on the entry-level Prime versions.

Customers have the choice of two infotainment systems – Multimedia Pro on Prime versions, and Multimedia Pro Navi on Pro vans.

The Multimedia Pro system features a new 10-inch HD touchscreen with wireless mirror screen, DAB radio, voice control and Bluetooth®.

This is complemented by the Multimedia Pro Navi system included with Pro versions which adds fully integrated satellite navigation, as well as a 10-inch colour digital instrument cluster.

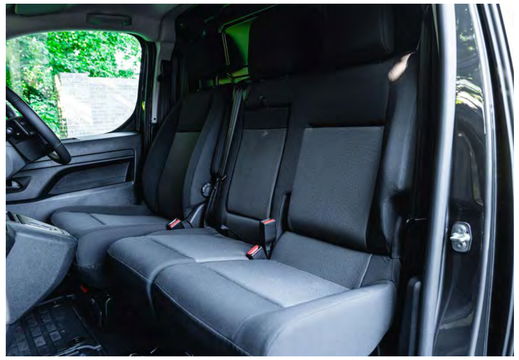

Again, getting comfortable is no problem, with the driver's seat featuring six-way adjustment plus lumbar control, and an armrest. The passengers, meanwhile, get a bench seat with underfloor storage.

As with the new Combo, the Pro version of the new Vivaro comes with the Flex Cargo feature, with the centre seat backrest again folding flat for use as a table or work surface, and a load-through bulkhead.

In addition, the storage spaces around the instrument panel and the centre console have been enlarged, making it easier to stow everyday items.

New Movano

The cockpit of the new Movano has been comprehensively redesigned to deliver a more versatile, comfortable and connected environment for drivers.

Electric versions come as standard with a seven-inch colour touchscreen at the top of the centre console featuring DAB radio, Bluetooth® and wireless Android Auto™/Apple CarPlay™. This is complemented by a seven-inch colour driver information centre.

The most important functions can be controlled by voice recognition, while optionally available is a shelf in the centre console for charging phones inductively, which will be particularly useful for users such as delivery drivers who often have to use a mobile while at work.

Diesel versions, meanwhile, come with the Multimedia system, which has a five-inch colour touchscreen, DAB radio, voice control and Bluetooth®. The instrument cluster also includes a 3.5-inch digital display.

As with the other vans, the driver's seat has six-way adjustment plus lumbar control, while there is a dual passenger bench seat.

One optional new feature sure to be appreciated by many drivers is a 230-volt socket, which can be used to easily charge electrical devices such as laptops, electric tool batteries, tablets and other appliances rated at up to 150 Watts. The socket is positioned conveniently on the dashboard in a central location, and is easily accessible for front-seat occupants.

Payload and towing capacity

Vauxhall's vans have always been designed to provide maximum utility, and that is still very much the case in the electric era.

Whether customers choose an electric model or a diesel, they can rest assured that every vehicle in the line-up has been created to provide ultimate practicality for their business, large or small.

As a result, payloads and towing capacities are among the most competitive on the market, regardless of powertrain.

New Combo Electric

The new Combo Electric is leading the way when it comes to blending next-generation efficiency with the ability to tow and transport heavy loads.

The Panel Van offers a best-in-class payload of 781kg, while other versions are similarly competitive, with the XL Panel Van ranging from 691kg to 709kg depending on trim. The Crew Van, meanwhile, offers 642kg.

New Combo Electric also offers an impressive towing capacity (braked) of 750kg on all versions.

Electric	Minimum mass (kg)	Maximum indicative payload (kg)	Gross Vehicle Weights (GVW) (kg)	Plated weight front axle (kg)	Plated weight rear axle (kg)	Towing weights braked (kg)	Plated Gross Combination Weights (GCW) (kg)
Prime Panel Van	1,674	781	2,455	1,200	1,400	750	3,205
XL Prime Panel Van	1,741	709	2,450	1,200	1,400	750	3,200
Pro Panel Van	1,691	759	2,450	1,200	1,400	750	3,200
XL Pro Panel Van	1,759	691	2,450	1,200	1,400	750	3,200
XL Prime Crew Van	1,813	642	2,455	1,200	1,400	750	3,205

New Combo

The Panel Van also offers the maximum payload when it comes to diesel versions of the new Combo, with figures stretching from 982kg to 984kg, depending on specification. On XL versions, the equivalent range is from 927kg to 953kg. The diesel XL Crew Van, meanwhile, has a maximum payload of 827kg.

Towing weights are 1000kg across the board, with the exception of the 100PS XL Panel Van (1050kg), and the XL Crew Van (1030kg).

Diesel	Minimum mass (kg)	Maximum indicative payload (kg)	Gross Vehicle Weights (GVW) (kg)	Plated weight front axle (kg)	Plated weight rear axle (kg)	Towing weights braked (kg)	Plated Gross Combination Weights (GCW) (kg)
Prime Panel Van 100PS Turbo D	1,338	982	2,370	1,200	1,400	1,000	3,370
Prime Panel Van 130PS Turbo D auto	1,401	984	2,385	1,200	1,400	1,000	3,385
XL Prime Panel Van 100PS Turbo D	1,441	939	2,380	1,200	1,400	1,050	3,430
XL Prime Panel Van 130PS Turbo D auto	1,447	953	2,400	1,200	1,400	1,000	3,400
Pro Panel Van 100PS Turbo D	1,408	982	2,390	1,200	1,400	1,000	3,390
Pro Panel Van 130PS Turbo D auto	1,418	982	2,400	1,200	1,400	1,000	3,400
XL Pro Panel Van 100PS Turbo D	1,464	936	2,400	1,200	1,400	1,030	3,430
XL Pro Panel Van 130PS Turbo D auto	1,473	927	2,400	1,200	1,400	1,000	3,400
XL Prime Crew Van 100PS Turbo D	1,560	840	2,400	1,200	1,400	1,030	3,430

New Vivaro Electric

As with the new Combo Electric, there is no compromise in practicality when choosing the new Vivaro Electric.

Maximum payload for the Panel Van versions is a hefty 1001kg (rising to 1002kg for XL variants), while the Doublecab offers 940kg (and in XL guise, 924kg).

Opt for the new Vivaro Electric Platform Cab, and the payload/body allowance is 1658kg.

The towing capacity for all versions is 1000kg.

Electric	Minimum mass (kg)	Maximum indicative payload (kg)	Gross Vehicle Weights (GVW) (kg)	Plated weight front axle (kg)	Plated weight rear axle (kg)	Towing weights braked (kg)	Plated Gross Combination Weights (GCW) (kg)
Prime Panel Van	2,010	1,001	3,011	1,500	1,800	1,000	4,011
XL Prime Panel Van	2,043	1,001	3,044	1,500	1,800	1,000	4,044
Pro Panel Van	2,020	1,001	3,021	1,500	1,800	1,000	4,021

New Vivaro

Payloads for the diesel Vivaro Panel Van vary depending on the engine fitted, ranging from 1130kg for the XL Prime with the 120PS 1.5-litre, to the 2.0-litre manual Panel Van, which is rated at 1384kg.

Doublecab variants have a healthy 1242kg payload.

The towing weight across the new Vivaro diesel ranges from 2000kg to 2500kg.

Diesel	Minimum mass (kg)	Maximum indicative payload (kg)	Gross Vehicle Weights (GVW) (kg)	Plated weight front axle (kg)	Plated weight rear axle (kg)	Towing weights braked (kg)	Plated Gross Combination Weights (GCW) (kg)
Prime Panel Van 1.5 120 PS Turbo D	1,648	1,182	2,830	1,500	1,500	2,000	4,230
Prime Panel Van 2.0 145 PS Turbo D	1,716	1,384	3,100	1,500	1,800	2,500	5,000

New Movano Electric

As the table on the right indicates, the new Movano Electric is available in three lengths and three heights, with the differing configurations all having a corresponding impact on maximum payload.

What is not impacted, though, is the new Movano's renowned practicality.

On the N2 versions of the Panel Van, maximum payloads range from 1385kg to 1460kg, depending on version, ensuring businesses are well covered whatever their choice.

The maximum towing weight is 2400kg, regardless of version.

Electric N1 model

Electric	Minimum mass (kg)	Maximum indicative payload (kg)	Gross Vehicle Weights (GVW) (kg)	Plated weight front axle (kg)	Plated weight rear axle (kg)	Towing weights braked (kg)	Plated Gross Combination Weights (GCW) (kg)
L3 H2 Prime Panel Van 3500	2,865	710	3,500	2,100	2,400	2,400	5,900

Electric N2 models

Electric	Minimum mass (kg)	Maximum indicative payload (kg)	Gross Vehicle Weights (GVW) (kg)	Plated weight front axle (kg)	Plated weight rear axle (kg)	Towing weights braked (kg)	Plated Gross Combination Weights (GCW) (kg)
L3 H2 Prime Panel Van 4000	2,790	1,460	4,250	2,100	2,400	2,400	6,400
L3 H3 Prime Panel Van 4000	2,815	1,435	4,250	2,100	2,400	2,400	6,400
L4 H2 Prime Panel Van 4000	2,835	1,415	4,250	2,100	2,400	2,400	6,400

L3 H1 Chassis Cab	2,480	1,770	4,250	2,100	2,400	2,400	6,400

New Movano

Maximum payloads also differ slightly on diesel N1 versions of the new Movano, depending on the variant chosen.

These stretch from 1235kg on the L4 H3 version of the Panel Van to 1425kg on the L2 H1 model. L4 H3 and L4 H2 Panel Vans offer the maximum towing capacity at 3000kg, alongside one variant of the L3 H2 Panel Van. Otherwise N1 Movanos are rated at 2500kg.

There are two N2 new Movanos, the L4 H2 Panel Van and L4 H2 Glazed Panel Van respectively. These have maximum payloads of 1245kg and 1975kg respectively. The towing weight for both is 2250kg.

Diesel N1 models

Diesel	Minimum mass (kg)	Maximum indicative payload (kg)	Gross Vehicle Weights (GVW) (kg)	Plated weight front axle (kg)	Plated weight rear axle (kg)	Towing weights braked (kg)	Plated Gross Combination Weights (GCW) (kg)
L2 H1 Prime Panel Van 3500 140PS Turbo D	2,000	1,500	3,500	1,880	2,000	2,500	6,000

Electric powertrains

Since 2021, Vauxhall has offered a fully electric version of every model in its LCV line-up. All three of Vauxhall's latest vans come with electric and diesel powertrains, providing a compelling choice for customers.

New Combo Electric

The newly updated Combo Electric offer major improvements over the outgoing version.

Of most significance is an increased range on a single charge of up to 213 miles (on the WLTP cycle) – a rise of 22% (38 miles) over the previous version. For context, Department for Transport research published in April 2021 showed that more than half of Britain's vans stayed within 15 miles of their base on a typical day.

The upgrades are made possible by a number of factors. Vauxhall's next-generation 52Wh battery is assisted by the addition of an optional heat pump – a first for the Combo Electric – which maintains a constant temperature more efficiently than standard climate control systems to conserve range, significantly improving efficiency in low temperatures.

Performance is impressive, too, with a new electric motor developing 100kW/136PS and 270Nm of torque propelling the new Combo Electric to a top speed of 82mph.

Customers who have never driven an electric van before will find doing so straightforward, thanks to the drive selector, which offers four settings – Park; Reverse; Neutral; Drive, and three levels of regenerative braking, controlled via paddles behind the steering wheel.

In addition, there are three modes which can be selected when driving. Normal offers a balance between performance and efficiency, Power is recommended when driving at high speeds, and Eco helps to achieve maximum range by deactivating all unnecessary energy-consuming features.

The new Combo Electric is available as a Panel Van, XL Panel Van and Crew Van, and service intervals are every two years or 25,000 miles, whichever comes first.

New Combo Electric drivetrain

CO_2 emissions	0g/km
Maximum power	100kW (136PS)
Maximum torque	270Nm (199lb. ft)
0-62mph	11.7 seconds
Top speed	82mph

New Combo Electric battery

Capacity	52kWh
AC on-board charger speed	7.4kW (11kW optional)
DC charging speed	100kW
WLTP Range (combined)	213 miles
Energy consumption (combined low/high)	172-217 Wh/km
Battery warranty	Eight years / 100,000 miles / 70% capacity

New Vivaro Electric

The new Vivaro Electric also takes a big step forward from its predecessor.

There's now an extended range on a single charge of up to 219 miles (WLTP), which represents an increase of 14 miles on the previous version.

The new Vivaro Electric is available with a 75kWh battery, and it is assisted in delivering energy efficient driving by a regenerative braking system which can be adjusted in three recuperation levels using paddle shifters behind the steering wheel.

A 100kW/136PS motor delivers 0-62mph in 14.3 seconds and takes the new Vivaro Electric on to a top speed of 81mph, while, as with the new Combo Electric, there are three selectable driving modes – Normal, Power and Eco.

One feature which will add appeal is the e-Power Take-off Unit, which can be used to supply smaller tools or fridge units for cooled vans with power from the traction battery. This means every business can choose the drivetrain it prefers.

The new Vivaro Electric is available as a Panel Van, XL Panel Van, Doublecab and Platform Cab, and service intervals are every two years or 25,000 miles, whichever comes first.

New Vivaro drivetrain

CO_2 emissions	0g/km
Maximum power	100kW (136PS)
Maximum torque	270Nm (192lb. ft)
0-62mph	14.3 seconds
Top speed	81mph

New Vivaro battery

Capacity	75kWh
AC on-board charger speed	7.4kW (11kW optional)
DC charging speed	100kW
WLTP Range (combined)	219 miles
Energy consumption (combined low/high)	22.4 to 26.4 kWh/100km
Battery warranty	Eight years / 100,000 miles / 70% capacity

New Movano Electric

It's all change for the new Movano Electric – and as befits the biggest van in the Vauxhall range, there is now more power to call on and a greatly increased range.

While the motor in the previous electric Movano had an output of 90kW/122PS, there is now a new motor that produces 205kW/279PS, a notable upgrade that has profound consequences for performance.

Where previously there was 260Nm of torque, the new Movano now benefits from having 410Nm at its disposal, meaning that it can move extremely quickly from a standstill, even when fully laden, and cover distances quickly at speeds up to 81mph.

Improved performance is complemented by increased range, with a new 110kWh battery offering up 263 miles (estimated WLTP) – a notable 107 miles further than before.

Three driving modes are available: Normal (limited to 160kW output); Eco for optimized efficiency (120kW) and Power for focused performance (205kW). There are also four levels of energy regeneration, which can be selected by paddles behind the steering wheel.

With three heights and two lengths available, the electric powertrain is offered on five different versions of the Panel Van, and also the Glazed Panel Van and Chassis Cab.

Service intervals for the Movano Electric are every one year or 16,000 miles.

In addition, a new Movano HYDROGEN will be available for those who want to travel long distances locally emissions-free and need to refuel quickly. It will offer a range of up to 311 miles (WLTP) and can be refuelled in five minutes. Customer deliveries are set to start in 2025.

New Movano drivetrain

CO_2 emissions	0g/km
Maximum power	205kW (279PS)
Maximum torque	410Nm (302lb. ft)
Top speed	81mph

New Movano battery

Capacity	110kWh
AC on-board charger speed	11kW
DC charging speed	150kW
Range (estimated WLTP)	Up to 235 miles (N1 models) Up to 263 miles (N2 models)
Battery warranty	Eight years / 100,000 miles / 70% capacity

Why go electric?

Running an electric van for the first time may seem a daunting prospect for many businesses – but there is a lot of help at hand, and there are many benefits to gain.

For drivers, electric vans offer a calmer driving experience, with a smoother power delivery and minimal noise levels. Of course, the zero-emissions-in-use powertrains also help to improve urban environments where many vans spend much of their time.

The Government's Plug-in Van and Truck Grant has been designed to help bridge the price gap between ultra-low emission vehicles and diesel-powered ones, and the new Combo Electric, new Vivaro Electric and new Movano Electric are covered by the scheme, which offers discounts of up to £2,500 on small vans and up to £5,000 on larger models.

Vauxhall is also offering a free 7kW home wallbox and standard installation for sole trader and SME business customers, enabling van drivers to charge with ease at home. This offer is available through Free2Move Charge, with the charger and installation provided by Octopus Energy.

As well as the cost saving of not having to buy diesel, there are also tax benefits to take into account – until April 2025, electric vans are exempt from road tax (VED), and there is no Benefit-in-Kind liability either.

Electric vans are also exempt from schemes such as the London Congestion Charge and Ultra Low Emission Zone, plus typically are charged less in localised clean air zones across the country.

The Workplace Charging Scheme, meanwhile, offers help to eligible businesses, charities and public sector organisations, offering up to £350 per socket towards the cost of installing electric charge points.

Charging

Whichever electric Vauxhall LCV customers opt for, charging is straightforward, with rapid charging available on all three models.

It can be activated immediately, or by using the MyVauxhall app, drivers can specify delayed charging to take advantage of lower electricity tariffs during off-peak hours – and also when the grid often has a higher mix of renewable energy.

New Combo Electric

New Combo Electric comes fitted with a 7.4kW on-board charger and mode 3 cable. An 11kW on-board charger is available as an option.

New Vivaro Electric

New Vivaro Electric comes fitted with a 7.4kW on-board charger and mode 3 cable. An 11kW on-board charger is available as an option.

New Movano Electric

The new Movano Electric is fitted as standard with a dual on-board charger (single-phase 7kW and 11kW) which can meet all customer uses and charging solutions. The new Movano Electric is also equipped with a Type 2 charging cable.

New Combo Electric

Charging (supply)	Socket	Charge time (0-100%)
AC current – home wallbox or public charger (7kW)	Type 2	7 hours, 30 minutes
AC current – public charger (11kW)*	Type 2	5 hours
DC current – rapid charger (100kW)	CCS	30 minutes (0-80%)

*Requires 11kW on-board charger

New Vivaro Electric

Charging (supply)	Socket	Charge time (0-100%)
AC current – home wallbox or public charger (7.4W)	Type 2	11 hours, 20 minutes
AC current – public charger (11kW)*	Type 2	7 hours, 30 minutes
DC current – rapid charger (100kW)	CCS	45 minutes (5-80%)

*Requires 11kW on-board charger

New Movano Electric

Charging (supply)	Socket	Charge time (0-100%)
AC current – home wallbox or public charger (7kW)	Type 2	16 hours, 40 minutes
AC current – public charger (11kW)	Type 2	11 hours, 45 minutes
DC current – rapid charger (150kW)	CCS	55 minutes (0-80%)

Diesel powertrains

As well as the electric options (and forthcoming hydrogen-powered Movano), Vauxhall's vans are also available with diesel engines which offer effortless power and strong efficiency.

As with all combustion-engined light commercial vehicles under 3500kg, Vehicle Excise Duty is charged at a flat rate – £335 in the 2024/2025 tax year.

There is also a flat rate for Benefit In Kind taxation. This is £3,960 for the 2024/2025 tax year. That means drivers of Vauxhall diesel vans who pay tax at the standard 20% rate will pay 20% of £3,960, which equates to £720, or £60 a month. Those taxed at 40% will pay £1,440, or £120 a month.

New Combo

Vauxhall's smallest LCV is offered with a 1.5-litre turbocharged four-cylinder diesel, available in two states of tune (100PS and 130PS) on the Panel Van. The Crew Van is available exclusively with the 100PS powertrain.

The 100PS unit develops its maximum power at 3,500rpm, with maximum torque of 250Nm at 1,750rpm. The equivalent figures for the 130PS are 3,750rpm, and 300Nm at 1,750pm respectively.

The 100PS unit is paired exclusively with a six-speed manual gearbox, while the 130PS version comes with an eight-speed automatic transmission.

The auto eschews the traditional lever in favour of a transmission selection mode dial that can be twisted to select the desired setting – Park, for when the vehicle is stationary and the wheels are locked; Drive, for forward motion; Neutral, for when the vehicle is stationary and the wheels are free; and Reverse.

There are also shift paddles behind the steering wheel.

Combined fuel economy figures stretch from 48.7mpg to 51.5mpg, depending on configuration, while combined emissions range from 144g/km to 152g/km. The full figures are in the table below.

Both engines are compliant with Euro 6D emissions standards, and services are required at 25,000 miles or every two years, whichever comes sooner.

Fuel economy / Emissions Euro 6D (6.4)	WLTP economy (mpg) Combined low	WLTP economy (mpg) Combined high	CO_2 (g/km) low	CO_2 (g/km) high
Prime Panel Van				
1.5 100PS Turbo D	54.4	46.0	136	161

XL Prime Crew Van				
1.5 100PS Turbo D	54.4	46.0	136	161

New Vivaro

The new Vivaro comes with a 120PS 1.5-litre turbocharged four-cylinder diesel, and a more powerful 145PS 2.0-litre unit, which also receives direct-injection turbo assistance.

The 1.5 engine is offered exclusively with the new Vivaro Panel Van and can only be paired with a six-speed manual gearbox, while the 2.0 can be specified with the manual and an eight-speed automatic, as well as with the new Vivaro Doublecab.

As with the new Combo, the automatic comes with a drive mode dial rather than a traditional lever, and there are shift paddles behind the steering wheel.

The 120PS unit develops its maximum power at 3,500rpm, with maximum torque of 300Nm at 1,750rpm. For the 145PS, the figures are 3,750rpm and 340Nm at 2000rpm respectively, or 370Nm at 2,000rpm with the start / stop equipped auto.

Again, both engines are compliant with Euro 6D emissions standards, and service intervals stretch from 25,000 miles to 32,000 miles depending on version, or every two years (whichever comes sooner).

New Movano

The biggest van in the Vauxhall line-up comes with a 2.2-litre turbocharged four-cylinder diesel.

It delivers 140PS at 3,500rpm, and 350Nm at 1,400rpm when paired with the new Movano's six-speed manual gearbox. With the automatic transmission, the torque figure rises to 380Nm at 1,400rpm.

There is also a 180PS version used in Panel Van N2 models, which delivers 450Nm of torque at 1,500rpm.

Safety

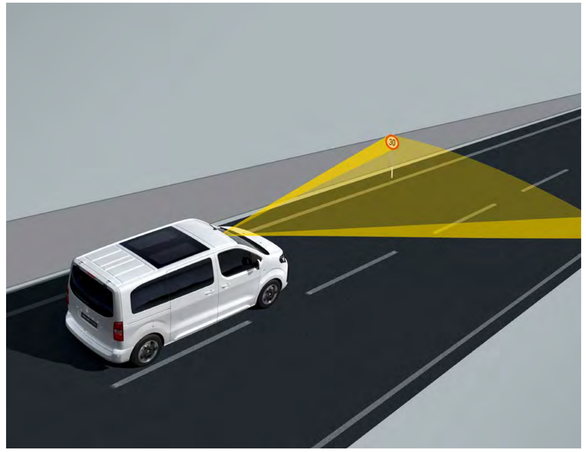

The new Combo, new Vivaro and new Movano come with a range of technologies designed to help reduce the risk of accidents and make drivers' time on the road as stress-free as possible.

Dynamic Surround View

Gives drivers a better understanding of the surroundings of their vehicle. The system incorporates a digital rear view mirror with cameras above the rear door and nearside exterior door mirror, extending the view of traditional rear-view mirrors. Features include side blind spot detection, which allows drivers to clearly see obstacles on the nearside, and a Visiopark 180-degree rear parking camera, which enables safer reversing courtesy of 12 parking sensors, with drivers now able to see a larger area on the digital display screen. Automatically activated when reverse is engaged or the rear doors are opened. Available on new Combo, new Vivaro and new Movano.

Intelligent speed assistance

Recognises speed limit signs and visually warns the driver of local restrictions followed by an audible alert if the limit is exceeded. Available on new Combo, new Vivaro and new Movano.

High beam assist

Switches the headlights between high beam and dipped beam automatically to avoid blinding other drivers. Available on new Combo, new Vivaro and new Movano.

Lane keep assist and lane support

If the driver has not actively steered or signalled when the vehicle moves outside its lane markings, the system performs corrective actions to prevent them crossing painted boundary lines or roadside edges. Available on new Combo, new Vivaro and new Movano.

Active cruise control with stop and go facility

This maintains the speed that has been set, but when a slower vehicle is detected ahead the system automatically lowers the speed to keep a safe distance. On vehicles with a manual transmission this is effective to a minimum of 19mph; on those with an automatic transmission it can bring them to a standstill if required. Available on new Combo, new Vivaro and new Movano.

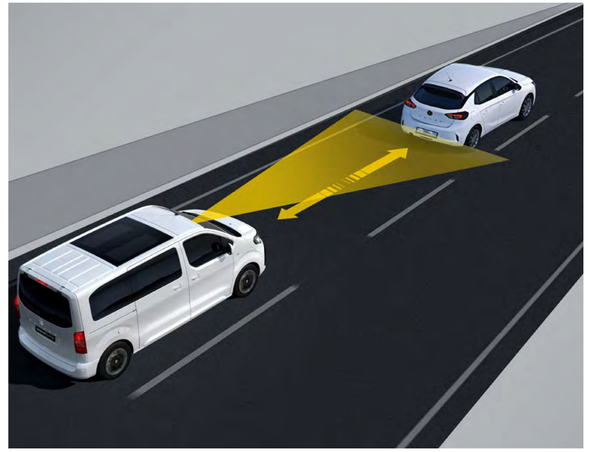

Driver attention alert

Minimises the risk of fatigue by monitoring time behind the wheel and sending warnings after two and three hours of continuous driving. Analyses driving behaviour via the front camera and steering wheel movements and warns when a break is advised. Available on new Combo and new Vivaro.

Forward collision alert incorporating Advance Emergency Braking System (AEBS)

Alerts the driver of a potential collision through visual and then audible warnings. Should the driver fail to react, autonomous emergency braking is triggered to help avoid or mitigate the impact by reducing the speed of the vehicle. AEBS provides additional assistance to optimise braking performance, while a dynamic brake support function boosts pressure to further reduce stopping distances. Available on new Combo, new Vivaro and new Movano.

Electronic Stability Control (ESC)

This has been upgraded in the new Movano with a series of additional features. Cross wind assist works at speeds over 40mph and helps a vehicle to avoid drifting out of its lane in strong crosswinds by intervening on braking. The trailer stability control system detects when a trailer is starting to swing dangerously, and can help bring it under control by applying the brakes to slow the vehicle down. And the post-collision braking system intervenes in the event of an accident, automatically applying the brakes to avoid a secondary collision.

Security

Vauxhall realises the importance of keeping vans and their loads secure at all times, and the new Combo, new Vivaro and new Movano are all available with a remote control security alarm system to help prevent theft.

Advanced lighting

Intelli-Lux Matrix lights

The new Combo and Combo Electric are available with Vauxhall's class-leading, adaptive Intelli-Lux Matrix LED® technology, which provides significantly improved visibility at night.

This is the first time such an advanced lighting system, which features in Vauxhall passenger cars, has been offered on a light commercial vehicle in the compact van segment, and illustrates Vauxhall's continuing desire to provide high-quality technology to as broad a spread of customers as possible.

Comprising 14 individually controllable LED elements (seven per side), the Intelli-Lux Matrix lights provide a brightly illuminated driving experience that precisely "cuts" other road users out of the high beam. This technology allows the new Combo to adapt the light beam pattern automatically to suit the driving conditions and surroundings, ensuring drivers have a clear view of the road ahead without dazzling others.

This functionality is facilitated by a camera mounted on the rear view mirror which is able to detect both ambient light and vehicle specific light, and then adjust the beam accordingly.

A study conducted by Technische Universität Darmstadt and the LSS (Light Sight Safety) has shown that at 50mph, the IntelliLux Matrix lights allow a vehicle to detect an object 30 to 40 metres earlier than with conventional halogen or HID systems. This gives the driver between 1.3 and 1.8 seconds more time to react.

The technology offers a number of different modes.

Motorway Mode recognises when the new Combo is travelling on a motorway and adapts the light beam to suit the driving conditions for optimum night-time motorway driving. The left side headlight beam is intensified while the right side is decreased to avoid dazzling oncoming road users.

Cornering Mode comes into play on tight bends or when turning off, depending on the steering angle or activation of the indicator. In this scenario, the road is illuminated in the direction of travel, meaning drivers no longer face turning off into pitch black side roads. This feature is activated at speeds of up to 24mph.

Town Light Mode is designed for use in urban areas with lots of traffic and changing light conditions due to street lighting. The wide and symmetrical beam is designed for optimum vision when driving through illuminated town roads. In particular, the shape and spread of the beam gives greater visibility to the sides of the vehicle, helping the driver see any potential hazards or pedestrians. Town light mode is activated at speeds of up to 34mph.

Country Light is similar to a low beam but illuminates a greater area to the sides of the vehicle, as well as the road ahead – adjusting automatically to avoid dazzling oncoming vehicles. Again, this is activated at speeds of up to 34mph.

Static Curve Light automatically illuminates the road in the direction of travel on bends in the road at speeds from 24mph to 43mph, and can also be activated depending on the steering wheel angle. This helps to illuminate previously hidden hazards, such as cyclists.

Specification

As with all Vauxhalls, the van line-up is offered with a simple choice of trims designed to make things straightforward for customers.

On the new Combo and new Vivaro, two generously equipped specification levels – Prime and Pro – are available from launch, ensuring that the differences between individual variants are easier to understand. Prime represents the entry point to the respective ranges, delivering all the essential equipment and features drivers would expect in a modern van at a competitive price.

Pro takes things up a level, with additional features offering extra comfort and practicality.

The new Movano keeps things even simpler, with both Electric and diesel versions available in well-equipped Prime trim.

And of course, across all three vans, a number of options are available to allow customers to tailor their vans to meet the needs of their business, with additional safety, driving assistance, security and design features all available.

Highlights of the individual vans are as follows.

New Combo

Standard Prime features

Infotainment

- Smartphone station with Bluetooth® and a smartphone interface compatible with Apple CarPlay™ and Android Auto
- Two speakers
- Vauxhall Connect

Interior convenience/styling

- Steering column adjustable for reach and rake
- Full-width overhead storage shelf
- Air-conditioning
- Driver's top-lidded glovebox
- 12V socket in dashboard
- Cruise control with speed limiter
- Steering wheel mounted audio controls
- Six-way adjustable driver's seat with lumbar adjustment
- Four-way adjustable passenger seat

Exterior convenience/styling

- Electrically adjustable/heated door mirrors
- Electrically operated front windows
- Nearside sliding side-access door
- Nearside and offside sliding side-access doors (XL)
- Asymmetrical solid panel rear doors
- Side-protection mouldings
- 16-inch steel wheels with centre caps

Safety and security

- Rear parking distance sensors
- Lane keep assist
- Intelligent speed assistance
- Driver attention alert
- High beam assist
- Automatic lighting control
- Advanced emergency braking system
- Electronic stability programme with traction control
- Electronic parking brake (Electric)
- Full-height steel bulkhead with clothes hook
- Hill start assist
- Halogen headlights with daytime running lights
- Remote control central deadlocking
- Engine deadlock immobiliser

Crew Van additional features

- Three-seat second-row bench
- Vinyl load floor covering
- Two-position moveable ladder frame bulkhead

Key Combo Pro additions

- Multimedia Pro Navi with 10-inch touchscreen, satnav, natural voice recognition
- 10-inch digital instrument cluster
- Two speakers and two tweeters
- FlexCargo Pack
  - Dual front passengers' fixed bench seat
  - Fold-flat centre seat backrest with table
  - Two-way foldable outer seat
  - Load-through bulkhead
- PVC floor covering in cabin
- Matrix LED® headlights with integrated daytime running lights and front fog lights
- 16-inch steel wheels with full-diameter wheel trims
- Body-colour bumpers and sliding door rail cover
- Black painted door handles and side-protection mouldings
- Electronically folding black door mirrors
- Dynamic surround view - blind spot detection, digital rear view mirror, front and rear parking sensors, flankguard detection of fixed obstacles, Visiopark 180° rear parking camera
- Rain-sensitive windscreen wipers
- Remote control security alarm system

New Vivaro

Standard Prime features

Infotainment

- Multimedia Pro with 10-inch HD touchscreen, wireless mirror screen, DAB radio, 4G connectivity and natural voice recognition
- Two speakers and two tweeters
- Vauxhall Connect

Interior convenience/styling

- 10-inch colour digital instrument cluster
- Reach and rake-adjustable steering wheel
- Steering wheel mounted audio controls
- Air conditioning
- Multi-function trip computer
- Cruise control with speed limiter
- Six-way adjustable driver's seat with lumbar adjustment
- Dual front passengers' bench seat with underseat storage
- Paddle shifters for regenerative braking selection – light/medium/strong (Electric only)
- 12V socket in lower glove box
- USB socket in dashboard

Exterior convenience/styling

- Rear parking distance sensors
- Electronic power steering
- Electrically adjustable/heated door mirrors
- Electrically operated front windows
- Nearside and offside sliding side-access doors
- Twin solid rear doors
- Side-protection mouldings
- 16-inch steel wheels with centre caps

Safety and security

- Electronic stability programme with traction control
- Advanced emergency braking system
- Full-height steel bulkhead
- Hill start assist
- High beam assist
- Automatic lighting control
- Intelligent speed assistance
- Lane keep assist
- Driver attention alert
- Daytime running lights
- Rain-sensitive windscreen wipers
- Remote control central deadlocking
- Lockable fuel filler/Electric charge flap
- Engine deadlock immobiliser

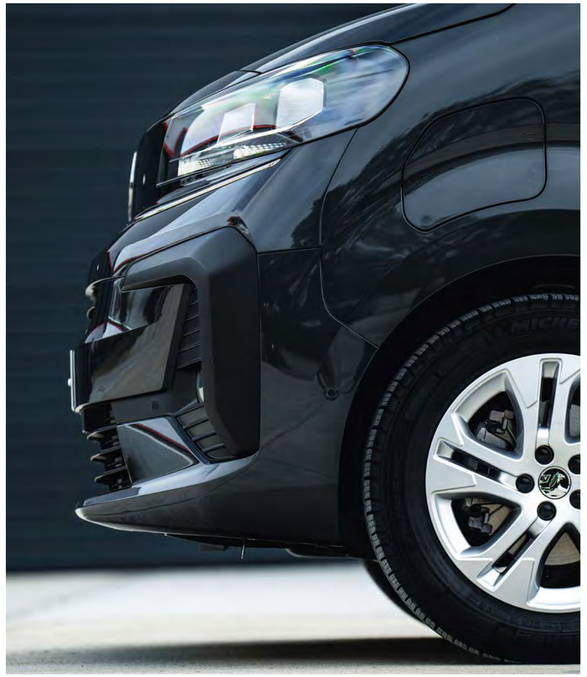

Doublecab additional features

- Three individually contoured rear seats
- Glazed nearside and offside access doors

Key Vivaro Pro additions

- Multimedia Pro Navi with integrated sat-nav
- FlexCargo load-through bulkhead
- Fold-flat centre seat backrest providing flat work surface
- Body-colour front and rear bumpers
- Black painted door handles and side protection mouldings
- 17-inch steel wheels with full-diameter wheel trims
- Dynamic surround view
  - Blind spot detection
  - Digital rear view mirror
  - Front and rear parking sensors
  - Flankguard detection of fixed obstacles
  - Visiopark 180° rear parking camera
- ECO LED headlights
- Front fog lights
- Electrically foldable door mirrors
- Remote control security alarm system

New Movano

Infotainment

- Multimedia with seven-inch colour touchscreen (Electric)
  - AM/FM/DAB digital radio
  - Bluetooth®
  - Wireless Apple CarPlay/Android Auto™
  - USB connection
  - Voice control
- Multimedia with five-inch colour display (diesel)
  - AM/FM/DAB digital radio
  - Bluetooth®
  - Voice control
  - USB connection
- Vauxhall Connect

Interior convenience/styling

- 7-inch digital instrument cluster (Electric)
- Automatic air conditioning (Electric)
- Manual air-conditioning (Diesel)
- Cruise control with variable speed limiter (Diesel)
- Electronic parking brake (Electric)
- Electronic power steering
- Six-way driver's seat with lumbar adjustment and armrest
- Dual passengers' bench seat
- Electric front windows
- Two cup holders and mobile phone storage in centre of lower dashboard

Exterior convenience/styling

- Side-protection mouldings
- Electrically adjustable/heated door mirrors with twin lenses
- Nearside sliding side-access door
- Twin unglazed rear doors (180° opening)
- 15-inch steel wheels with centre caps (3500 models)
- 16-inch steel wheels with centre caps (3500 Heavy/4000 models)
- Aerodynamic Kit (Spoiler & Active Grille Shutter)

Safety/security

- Rear parking distance sensors
- Perimeter alarm
- Electronic stability control
- Full-height steel bulkhead
- Advanced emergency braking system
- Lane support system
- Traffic sign recognition
- Driver drowsiness detection
- Intelligent speed assist

Glazed Panel Van additional features

- Twin glazed rear doors (180° opening)
- Gazing to row 2, 3 and nearside sliding side loading door

Pricing

Combo Electric

Trim	Version	Price (exc. VAT)	OTR RRP after PiVG (exc. VAT)
Prime	136PS 52kWh Panel Van	£28,550	£27,100

Aftersales

Vauxhall understands how integral vans are to many businesses, which is why it is committed to making the ownership experience as hassle-free as possible.

As part of that it has devised its Service4Fleet promise, a set of standards designed to minimise any potential disruption to drivers and fleet operators.

Among the commitments it makes is to service bookings at Vauxhall Van Business Centres within three working days, with all bookings confirmed within 20 minutes.

If drivers are concerned about mobility while their vehicle is being worked on, courtesy cars can be provided, while van collections and deliveries are also offered.

At the Centres themselves, 90-minute express servicing is available, as is overnight servicing. Pre-booked vans dropped off by 5.00 pm will be ready by 10am the next day.

In the event of urgent repairs being required, a diagnosis will be provided with 24 hours of drop-off, with no further appointment required. All work at Van Business Centres is carried out by Vauxhall trained technicians, and only genuine parts are used. Plus CV specialists are always on hand to discuss any specific needs or requirements. And with a standard set of pricing applied nationally, costs are transparent from the outset.
