# BOXER

PRICES - EQUIPMENT - TECHNICAL SPECIFICATIONS

Effective from 1st October 2026
2026 Model Year (14)

LET'S BEGIN

# MEET THE RANGE

## PEUGEOT BOXER

**PEUGEOT BOXER is the largest model in PEUGEOT's van line-up. Alongside an upgraded exterior and interior design, it features a new electric powertrain providing impressive enhancements to the range, latest-generation connectivity and more sophisticated driving aids.**

**The BOXER's updated exterior styling reinforces its robust and attractive design while optimising its aerodynamic efficiency. The interior of the BOXER has also been extensively overhauled with a new steering wheel design, instrument cluster, dashboard, seat fabrics, and door panels.**

# PEUGEOT BOXER | STANDARD EQUIPMENT

## PANEL VAN
## PROFESSIONAL

### COMFORT AND CONVENIENCE

- Air conditioning (Manual on Diesel, Automatic on Electric)
- Rear parking sensors
- Cruise control with speed limiter (not available on Electric or 4.25T versions)

*Currently there is no PiVG approval for Chassis Cab electric variants - This version is for large fleet orders only
Category N1: Vehicles designed and constructed for the carriage of goods and having a maximum mass not exceeding 3.5 tonnes.
Category N2: Vehicles designed and constructed for the carriage of goods and having a maximum mass exceeding 3.5 tonnes but not exceeding 12 tonnes. N2 vehicles are legally required to be speed limited at 56mph, and have a tachograph

All information and prices correct at time of publication, but are subject to change at any time without prior notice (which may occur as a result of matters including, but not limited to, any changes in legislation and/or any changes by the government). Please see our Prices and Specifications brochures or contact your local Peugeot Retailership for the most up-to-date prices and specification details for all models.

† All Manufacturer's Recommended Basic Prices are exclusive of V.A.T., Delivery to Retailer and Number Plates, Government First Registration Fee and Vehicle Excise Duty. (VED Rates used are applicable from 1st April 2026)
^ The Government PiVG is worked out at 35% of the Base Vehicle Price (incl. VAT) and including any discounts applied up to a maximum of £5,000. The grant is a government incentive and is subject to withdrawal prior to delivery of your vehicle.

**Any vehicle ordered (including panel vans) for a conversion that changes the base vehicle type approval must be aligned to a Stellantis Certified Convertor within CustomFit Conversion tool by entering the associated vehicle order number. Please note that if the vehicle order number is not inputted into CustomFit Conversion tool then the order/s will be cancelled.**
**It is also important that you discuss your conversion project with the converter before ordering the base vehicle. https://convertool.stellantis.com/**

All information and prices correct at time of publication, but are subject to change at any time without prior notice (which may occur as a result of matters including, but not limited to, any changes in legislation and/or any changes by the government). Please see our Prices and Specifications brochures or contact your local Peugeot Retailership for the most up-to-date prices and specification details for all models. CO2 figures above are for a standard vehicle without any additional optional equipment. The addition of optional extras could increase the certified CO2 emission output. WLTP figures shown are for comparison purposes and should only be compared to the fuel consumption and CO2 values of other vans tested to the same technical standard.

The fuel consumption achieved, and CO2 produced, in real world conditions will depend upon a number of factors including, but not limited to: the accessories fitted (pre and post registration); variations in weather; driving styles and vehicle load. The WLTP (Worldwide Harmonised Light Vehicles Test Procedure) is used to measure fuel consumption and CO2 figures. † All Manufacturer's Recommended Basic Prices are exclusive of V.A.T., Delivery to Retailer and Number Plates, Government First Registration Fee and Vehicle Excise Duty. (VED Rates used are applicable from 1st April 2026)

# PEUGEOT BOXER | ALSO INCLUDES A FLEET MANAGEMENT SERVICE OFFER....

STELLANTIS

## PREVENTIVE MAINTENANCE

The Preventive Maintenance Service is designed to help monitor and optimise the health of commercial vehicle fleets, offering support through live alerts and upcoming maintenance reports. This makes it easier for fleet managers to keep their vehicles in good working condition, saving time and money.

- Fleet Dashboard View
- Maintenance Tracking
- Report via Email
- Vehicle Health Alerts
- Van Maintenance Appointment

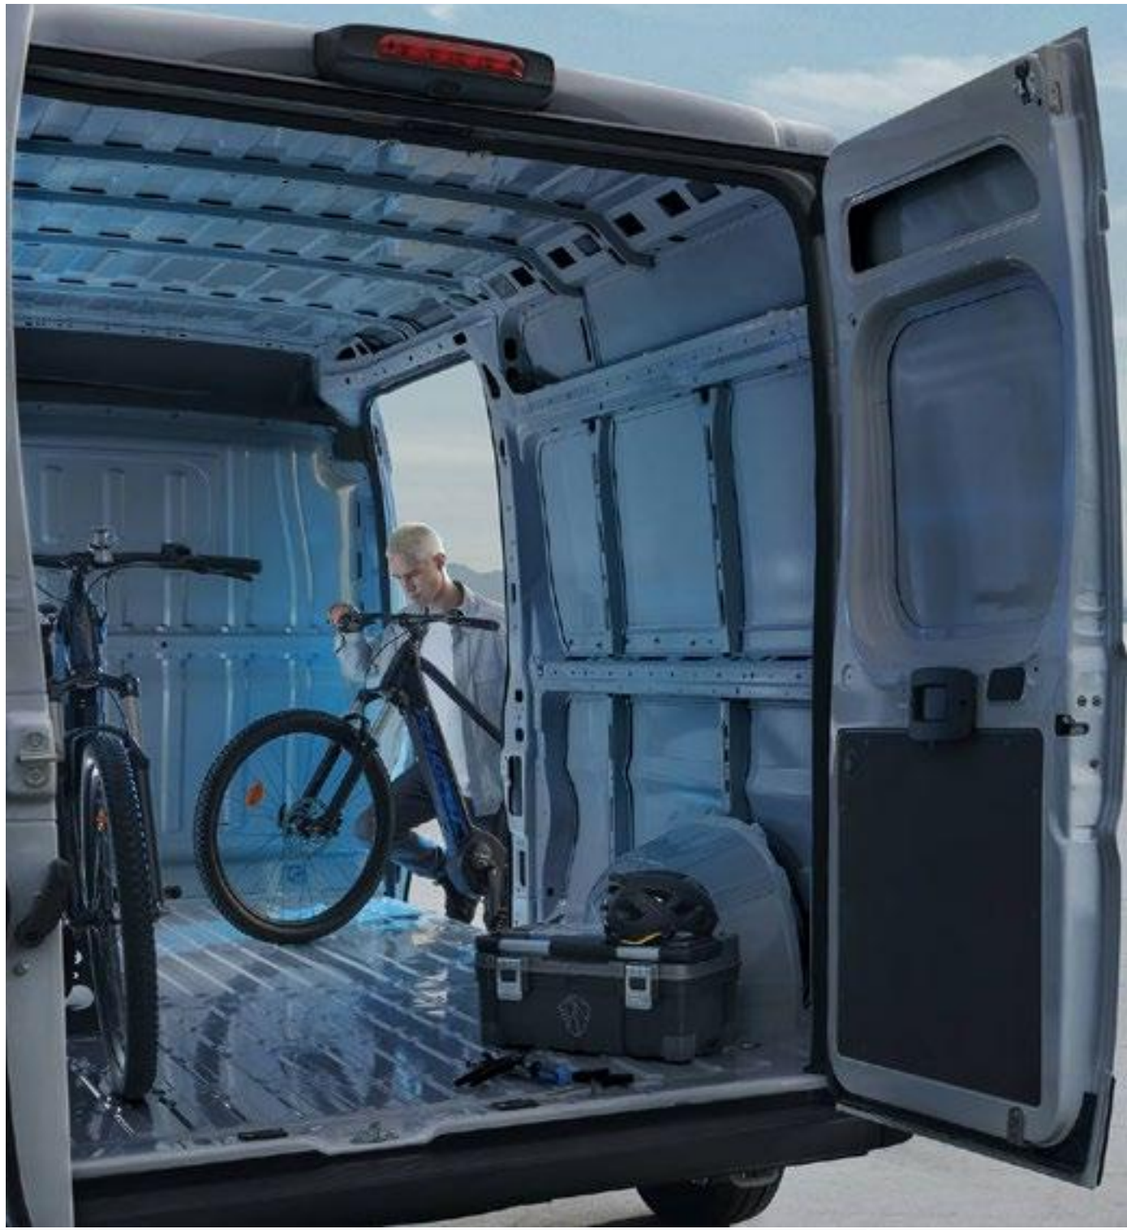

Connect Fleet

Customers can upgrade (via subscription) to Connect Fleet. This management platform is a full version opening up a broader spectrum of possibilities. With Connect Fleet customers can optimise the use of their vehicles by gaining access to consumption reports, mechanical alerts, eco driving and driving behaviour reports and vehicle geolocation in the event of theft in real time.

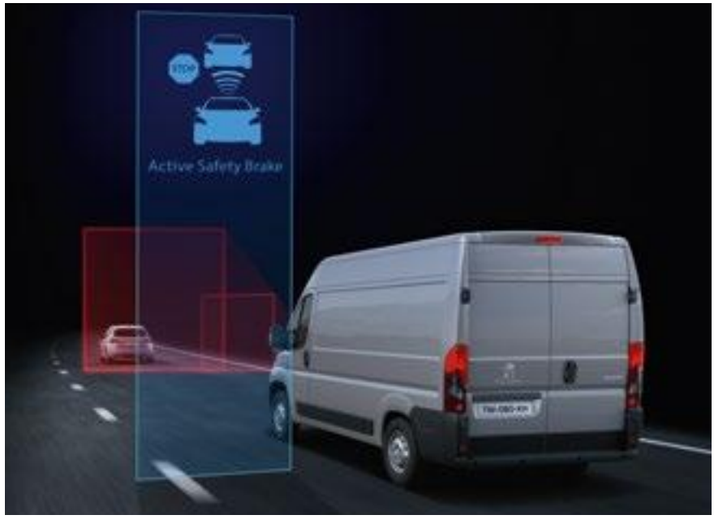

**For more details** click here

**For contact** click here

**4 YEARS TRANSFERABLE**

# PEUGEOT BOXER | SAFETY FEATURES

## Advanced Emergency Braking System (AEBS)

This system alerts the driver of a potential collision through a combination of visual and then audible warnings. Should the driver fail to react, autonomous emergency braking is triggered to help mitigate/avoid the impact by reducing the speed of the vehicle. AEBS provides additional assistance to optimise braking performance while a dynamic brake support function boosts pressure to help further minimise stopping distances.

Note: Peugeot driver assistance systems are intended to support the driver within the system-imminent limitations. The driver remains responsible for the driving task at all times.

*Option available at additional cost ** Standard on N2 models

## Blind Spot Information System (BSIS)**

Audio and visual warnings will alert the driver in case the vehicle approaches an obstacle or has to go through narrow spaces. The audible warning will keep beeping with increased intensity as the obstacle is nearing and will decrease as soon as the obstacle is out of reach.

## Moving Off Information System (MOIS)**

The Moving off information system and Blind spot information systems works together in order to allow the recognition of side obstacles inside the blind side area opposite to driver's position. Driver is alerted by a visual warning on cluster and the mirrors, when approaching obstacles located into the blind lateral area.

## 360° Perimeter Parking Sensors*

The 360° Perimeter Parking Sensors alert the driver both acoustically, and visually when the vehicle is approaching obstacles or going through tight spaces. Depending on vehicle length there are either 14, or 16 sensors surrounding the vehicle. These are located on the front and rear bumpers and also within the side mouldings.
Visual warning is displayed on the cluster screen by the vehicle shape surrounded by three proximity bands, showing the vehicle distance from obstacles, while the acoustic (beep) warning increases in frequency as the obstacle comes nearer, becoming a continuous beep as the obstacle distance is lower than 30 centimeters.

octopus energy

Peugeot have partnered with Octopus Energy to provide everything you need for your new Peugeot Boxer, including a tariff, charger and a solution for charging on the go making owning an electric vehicle easier and hassle-free.

Click here for more information.

**Single-speed electronic drive selector**

As the motor is an all-electric single-speed drive unit, there is no need for multiple gears. Instead, the driver selects from the facia-mounted buttons the following:

• **P:** Parking • **R:** Reverse • **N:** Neutral • **D:** Drive

Driving modes enable the driver to optimise the range in real conditions. Three drive modes are available:

**Eco**: for a smooth and economical drive

**Normal**: for a comfortable and balanced drive

**Power**: for a powerful and responsive drive

There are four E-Coasting modes for regenerative braking enabled by the paddles on the steering wheel:

**E-Coasting 1:** Free wheeling

**E-Coasting 2:** Low deceleration

**E-Coasting 3:** Medium deceleration

**E-Coasting 4:** High deceleration

*All N2 vehicles are legally required to be speed limited to 56mph

As all e-Boxer are homologated as Heavy and are not subject to WLTP testing, the range and electric consumption figures mentioned are calculated using WLTP Test Procedure methodology, on which the basis of all new Light Commercial or Passenger vehicles up to a GVW of 3500kgs are type approved, from 1 September 2018. The figures may vary depending on actual conditions of use and on differing factors such as: speed, thermal comfort on board the vehicle, driving style and outside temperature. The charging time depends in particular; on the power of the charger on board the vehicle, the charging cable and the type of cable used. Please contact your dealer or refer to www.peugeot.co.uk for further information.

# PEUGEOT BOXER | GLOSSARY OF TERMS

## PLATED WEIGHT
The maximum weight to which a vehicle or an axle may be loaded, determined either by the design of the components or by legislation. All commercial vehicles must carry a manufacturer's 'plate' showing the vehicle and axle gross 'plated weights'. It is an offence to drive a vehicle in a condition where any of these weights are exceeded.

## KERB WEIGHT
The Minimum Mass minus the driver's weight. When Kerb Weight used, driver weight is included within the Maximum Indicative Payload weight.

## MINIMUM MASS
Minimum Mass ('Mass in running order' on Certificate of Conformity and 'Mass in Service' on V5C form) is defined according to European Type Approval and include all fluids, tools and 90% fuel load. It is minimum mass for this variant and does not consider local specification/trim or deletable options (specific to Boxer). Weights are also subject to manufacturing tolerances (EU Legislation allows 5% tolerance).

## GROSS VEHICLE WEIGHT (GVW)
The total permissible weight of a vehicle including payload and passengers, as shown on the manufacturer's plate.

## GROSS COMBINATION WEIGHT (GCW)
The maximum permissible weight of a vehicle, including payload and passengers, combined with the total weight of any trailer it is towing. The maximum GCW weight limit is quoted on the vehicle plate and must not be exceeded.

## PAYLOAD
The total permissible weight that can be carried without exceeding the vehicle's plated weight. Payload do not include driver but do take into consideration specification/trim level:Weights are also subject to manufacturing tolerances (EU Legislation allows 5% tolerance). Payload does not consider any additional options that a customer may order.

## ROOF LOADS
Roof loads should be evenly distributed. Max roof load on L2 is 100kg, L3 150kg and L4 200kg

## MAXIMUM TOWING WEIGHT
The maximum weight of any trailer and its load which may be towed within the limit of the vehicle's plated Gross Combination Weight (GCW). It is based on the ability of the vehicle – at full GCW – to restart on a 12% gradient, which is approximately 1 in 8.3, at sea level. At altitudes above 1500 metres, the engine output may drop with a corresponding reduction in towing capability. It is the operator's responsibility to ensure that the trailer noseweight does not cause the rear axle plated weight of the towing vehicle to be exceeded.

Always fit Peugeot towing attachments and accessories available from your Peugeot Commercial Vehicle Retailer. They are designed specifically for Peugeot models and carry a 12-month warranty.

## COMMERCIAL VEHICLE CATEGORIES
Differences between N1 and N2 (Vehicles with GVW above 3500kg)

**Category N:** Goods vehicles
**Category N1:** Vehicles designed and constructed for the carriage of goods and having a maximum mass not exceeding 3.5 tonnes.
**Category N2:** Vehicles designed and constructed for the carriage of goods and having a maximum mass exceeding 3.5 tonnes but not exceeding 12 tonnes.

**Specific differences:** N2 vehicles are legally required to be speed limited at 56mph, and have a tachograph

# PEUGEOT BOXER | FACTORY CONVERSIONS

## DROPSIDE*

THE BOXER DROPSIDE FEATURES AN OPEN PLATFORM WITH FOLD DOWN SIDE PANELS TO MAKE LOADING AND UNLOADING OF GOODS EFFORTLESS.

- Frame and cross-members in powder coated high-strength steel.
- Plywood load floor (12mm thick) with non-slip and scratch resistant resin coating.
- 400mm high and 25mm thick anodised aluminium removable side and rear panels with recessed hinges. Edge profiled for tarpaulin fixation.
- Integrated cabin protection made from powder coated high-strength steel with perforations to improve driver's visibility. Two lateral lashing rings.
- Integrated lashing rings on load floor (conforming to EN 12640 standards) secured with rubber plugs to avoid vibration.
- Rear plastic mudguards.

*Images shown are not UK specification, alloy wheels are not available in UK

## TIPPER*

THE BOXER TIPPER HAS AN OPEN PLATFORM THAT CAN BE EASILY LIFTED TO DUMP OUT THE LOAD. OUR FACTORY CONVERTED TIPPER IS A ONE-WAY DESIGN.

- Frame and cross-members in powder coated high-strength steel.
- Load floor made from powder coated high-strength steel, with "curved protection" at the rear which helps guide the flow of transported material as well as providing additional structural strength when loading and unloading.
- 400mm high anodised aluminium opening (180°) side panels and tipping pins with self-lubricating hinges and integrated roping hooks.
- Tailboard features dual-mode hinge enabling both tip-through and tip-over functions. Rear pillars are made from high-strength steel and feature a patented locking mechanism.
- Tipping angle of 45° with lifting time of 30-40 seconds.
- Integrated cabin protection made from powder coated high-strength steel with perforations to improve driver's visibility.
- Non-protruding 4-stage telescopic cylinder hydraulic ram. Control unit features anti-foam system for maximum tipping capability. 12-Volt System compliant to 2006/42/EC and 2009/19/EC with a pressure of 120 bar to limit overloading.
- Six integrated load lashing rings resistant to 800 daN.
- Rear plastic mudguards.
- Fixed towbar (solid ball, no safety pin)
